

TRANSPORT SERVICE WAREHOUSING

GÖDECKELOGISTIK

“THE BEST WAY
TO YOUR
DESTINATION...”

Matthias Gödecke (Managing Director of Gödecke Eurotrans GmbH)

GÖDECKE LOGISTIK stands for quality and dependability. We have served the Baltic region as transport and logistics experts for more than 60 years. Throughout Germany, Scandinavia and eastern Europe: We keep things moving.

The world of logistics is becoming increasingly complex. We are growing with it. And with you. That's because you are our primary concern. We provide personal advice and organisational support plus services like interim storage to make sure that your goods reach their destination on time. With GÖDECKE LOGISTIK as your partner you get everything from a single source: efficient, customer-friendly transport solutions that keep you ahead of the competition. Together with our experienced partners we can meet all the logistics requirements placed on a modern transport company. The result is consistently high quality, a smooth transport chain and loyal, satisfied customers who value our outstanding service.

A PASSION FOR THE JOB

As a service company we can count on a dynamic team made up of well-trained, enthusiastic and experienced employees. Each and every one of them is personally committed to doing the job right. They are available at all times, communicate with you directly and provide expert advice to ensure that your goods are delivered on time. That is what drives us every day: a passion for logistics.

Qualified employees, reliable partners and a trusting relationship with our customers – these are the strengths of GÖDECKE LOGISTIK.

ON THE ROAD FOR YOU IN THE NORTH

Our big yellow trucks are a familiar sight throughout Germany and Scandinavia. For more than 60 years we have served all of northern Europe, with bases at three strategically favourable locations: Lübeck in Germany, Malmö in Sweden and Świnoujście in Poland.

We maintain a modern vehicle fleet at each of our branches. Whatever kind of vehicle you need, we can supply it: from trucks for local haulage with tail lifts to standard curtainsider trailers to jumbo articulated trucks. And of course we have the latest technology and qualified drivers, ensuring compliance with the most stringent quality and safety standards. Whether your destination is in the region, the country or elsewhere in Europe, our big yellow trucks will get your goods there as safely and quickly as possible.

GOOD HANDS FOR YOUR GOODS

We offer comprehensive transport, warehousing and logistics solutions for the regions surrounding our bases in Lübeck, Malmö and Świnoujście. Our services include express delivery to outlying areas, transshipment, storage and order picking.

In addition, we transport full or part loads to any destination in Europe, using either direct or multimodal transport. Our logistics strategy also includes an extensive general cargo network for reliable day-to-day haulage. Take advantage of our perfectly coordinated processes and smoothly functioning infrastructure.

SAFETY ALL THE WAY

We put safety first: for people, for the environment and for cargos. We therefore have all the necessary means for transporting hazardous goods (excluding Classes 1 and 7). Our vehicles are equipped with special additional equipment for hazardous loads. In addition, our drivers receive regular safety training. With our state-of-the-art systems for securing cargo and corresponding know-how we meet all the applicable safety standards, thus guaranteeing first-rate safety for sensitive goods.

WE DISCOVER POTENTIAL

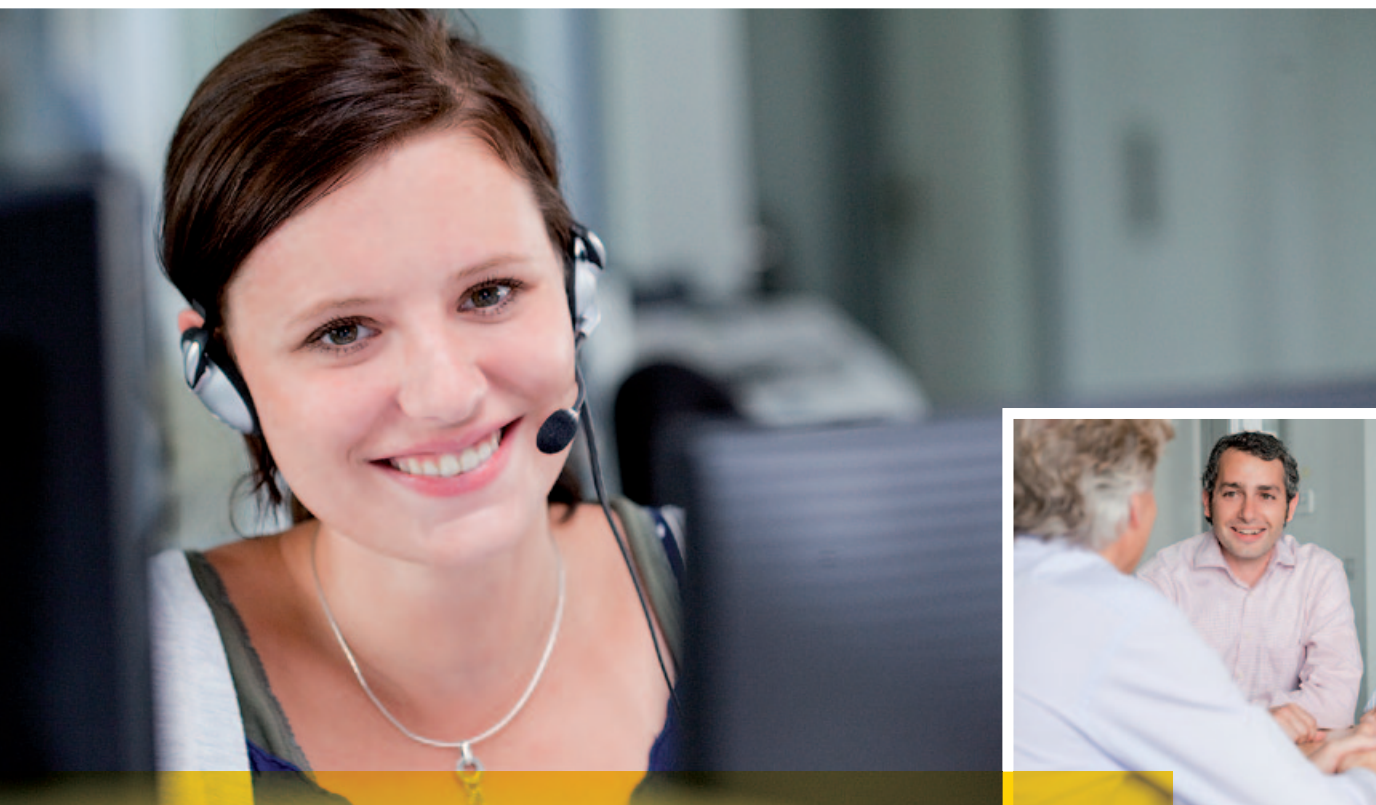

For us, logistics means more than just transporting goods reliably and punctually from one place to another. Our comprehensive range of services goes beyond what ordinary transport companies offer.

We advise you on how to optimise your value chain. We develop transport solutions that are tailored to your company, including transport advice, cost analysis, investigation of transport damage and discovery of free capacity. By making your logistics processes transparent and increasing your efficiency we create substantial added value. Our experienced consultants are familiar with all the cost drivers. They identify them and

devise custom solutions to minimise your company's costs. By freeing up resources in this way they allow you to put more time and effort into what you do best.

KEEPING YOU UP TO DATE

In addition, we train your employees in securing cargo. Our safety expert, who has years of experience in international goods transport, brings them up to date on loading, transshipment, the transport process itself and current statutes and guidelines. He also provides your drivers with useful information and practical tips.

AN IDEAL LOCATION

Lübeck is deservedly known as the gateway to the North. You'll find that our depot in Lübeck, with its connections to the entire Baltic region, is an ideal base for shipping your goods (refrigerated goods excluded). The major destinations in Scandinavia, eastern Europe and central Europe are less than 24 hours away. Whether it's transshipment, storage, order picking or cross-docking, GÖDECKE LOGISTIK is your professional partner in the North.

PRIME LOCATION

Take advantage of our strategically favourable location for your transport operations. We'll pick up and deliver your goods at any time of the day or night. Or use us as a link to your customers. Store your goods with us whenever you want to. We'll deliver them according to your instructions, right on time.
